

Product Name :
Astra Scientific Distributor Ignition System Traine

Product Code :
ThermalLab0004

Description :

Astra Scientific Distributor Ignition System Traine

Technical Specification :

The Distributor Ignition System Trainer is a training board used to teach the ignition system with distributor. The trainer is manufactured using brand new OEM components.

Working model designed to demonstrate the student's operation of a typical electronic ignition system used in cars. The trainer consists of an Ignition coil distributor set of spark plugs & 12 V DC power supply. The components used are from actual automobile petrol engines In order to show the spark generation & firing order, the distributor is driven by a low-speed electric motor.

FEATURES:

- This includes all the individual components of the system presented on a steel turret so that each component can be clearly identified.
- Demonstration model consisting of actual components used in Automobiles.
- Visualization of Spark & Firing order.

- Electric motor for driving the distributor.

SPECIFICATIONS:

- All brand new components
- Distributor with hall effect sensor
- Ignition control module
- Ignition coil
- Spark plugs and plug wires
- Fault box with 4 faults
- Test points for diagnosis
