

Product Name :
Astra Scientific Working Model of Torsion Differential

Product Code :
AutomobileLab0036

Description :

Astra Scientific Working Model of Torsion Differential

Technical Specification :

The Accurate section of Torsion bevel gear pair differential assembly, to show the complex operation system, which works according to the worm screw principle. Fitted to top of the range 4WD vehicles.

This cutaway model is carefully sectioned for training purposes, professionally painted with different colours to better differentiate the various parts and cross-sections. Many parts have been chromium-plated and galvanized for a longer life.

The training model can be used as visual aid for students of mechanical subjects to demonstrate and explain the structure and components. Also, automotive training stand can be used as a educational equipment for the mpfi system repair and service procedures.

FEATURES:

- Differential working model ideal for classroom demonstrations
- Cross-sectioned various parts to show internal operation

- Operated: Manually
- Equipment Layout: On Base with wheel
- Fine finish
- Simple operations
- Functional accuracy

SPECIFICATION:

- Fully functional, Drive Shaft differential system is installed in a mobile solid frame.
- Manually operate the mechanism
- Sturdy powder coated metal stand
