

Product Name :
Martindale Abrasion Tester

Product Code :
FABRIC SUK-AS03LAB017

Description :

Martindale Abrasion Tester

Technical Specification :

- Material
Metal
- Power Source
Electric
- Weight
25-40 Kilograms (kg)
- Usage

resistance to abrasion by calculating the loss in mass of the fabric

We have carved a reputed niche in industry for manufacturing and exporting **Martindale Abrasion Tester**. It is most commonly utilized in textiles and leather processing industries. This tester is required to determine wear resistance of a specific fabric or material. It is ideal to be used for testing upholstery, footwear, & gloves as well. **Martindale Abrasion Tester** uses standardized abrasants against which specimens are rubbed to determine their resistance. It is highly appreciated for allowing easy switching between abrasion, pilling, & crocking test tools.

Features:

- Assures quick motion change without need of any tool
- Equipped with LCD display to show results
- User friendly operation

Martindale Abrasion Tester

Technical Specifications

Maximum number of test specimens that can be tested at a time
Speed of outer pegs
Ratio of speeds of outer pegs to central peg
Stroke of pegs
Weight area of specimen holder
Pressure on test specimens
