

**Product Name :**  
Astra Rotary Vane Vacuum Pump

**Product Code :**  
ASTRALAB-SUPPLYA7006

**Description :**

Astra Rotary Vane Vacuum Pump

**Technical Specification :**

The rotary vane vacuum pump is a two-stage high-speed direct-drive rotary vane vacuum pump.

The rotor is eccentrically installed in the cylindrical casing of the stator, and the blades are freely installed in the corresponding slots of the rotor.

The rotational speed of the rotary vane vacuum pump is 1400 (rpm). Suitable for glass reactors, rotary evaporators, short-path distillation, molecular distillation, vacuum drying ovens and other equipment.

Rotary vane vacuum pump is a two-stage directly connected rotary vane vacuum pump, which can be used for drying, sealing containers and other auxiliary suction or vacuum equipment.

It has the advantages of small size, light weight, low noise, and convenient use.

Rotary vane vacuum pumps cannot be used as compression pumps.

The rotary vane vacuum pump can be used alone, or as a pre-pump for a booster pump, diffusion pump, molecular pump and titanium pump. It is also used in the production of electronic equipment, vacuum drying, filtering, welding, metal smelting, etc.
