

Product Name :
Z-80 Microcomputer Trainer

Product Code :
ASTRALAB-SUPPLYA21008

Description :

Z-80 Microcomputer Trainer

Technical Specification :

Debug functions are also available via PC or system keypad interface. Students edit and make a assembly program codes from PC and observe instant results after they download and execute programs from system memory.

Power supply and all experimental peripherals are built in a single unit to carry out Z-80 experiments that require

no additional equipment.

External interface allows user to create user-defined circuits.

All chip sets are protected by an acrylic cover on the top of trainer panel.

Programming codes are downloaded / debugged / executed via PC or trainer keyboard.

Demo programs are permanently stored in system ROM to offer quick system test and functional demonstration.

All chip names are clearly printed in corresponding position on acrylic panel.
