

Product Name :
Residential & Commercial Electrical Wiring Trainer

Product Code :
EL - CT1

Description :

Residential and Commercial Electrical Wiring Trainer is double-sided and designed to teach and experiment in the field of residential and commercial electricity, as well in various building services in compliance with standards.

The electrical wiring trainer includes two different sections (A and B) that can be easily joined together. Section A is double-sided and contains the same components on each side. Section B must be anchored on a wall and its front side is divided into two similar sections with eight (8) 1/4" x 3/4" x 1 1/2" Modupoints[®] offered in option. The symbols and specifications are silk-screened in black on the reverse side. Blue enamel coating. Terminals are 4-mm color-coded 5-way binding posts to make it easier for

interconnections with flying leads ended with 4-mm piggy back plugs. Sections A and B can also be customized according to your needs.
