

Product Name :
Hydraulic Trainer with Load Control

Product Code :
HY - DR2

Description :

Hydraulic Trainer with Load Control

Technical Specification :

Hydraulic Trainer with Load Control - This hydraulic training aid incorporates a specially designed circuit that applies a simulated load on the vertically mounted cylinder, which can be engaged and disengaged at the push of a button. In addition to the principles that are demonstrated with the basic unit, this trainer demonstrates the proper use of load holding devices. This unit is available as a single-sided or double-sided trainer.
