

Product Name :
Electro-Pneumatic Trainer

Product Code :
HY - DR6

Description :

Electro-Pneumatic Trainer - This integrated hands-on training aid has the same features as our basic pneumatic trainer plus it introduces students to the principles of electro-pneumatic devices and interfaces. An extensive lab manual is supplied to provide a complete and practical introduction to both basic pneumatic and electro-pneumatic technology. This training aid has a small PLC installed that is used to demonstrate sequential control of one, two or three pneumatic cylinders. The cylinders are fitted with magnetic reed switches to provide end-of-stroke position signals to the PLC. All the major components are permanently mounted which eliminates the potential for lost, misplaced, and damaged items. All pneumatic connection are made with various lengths of plastic tubing and push-to-connect fittings in each of the components. All electrical connections are low voltages and are made with the patch cords provided.
