#### **Product Name:**

Electrical, Electronic & Deumatic Calibration Bench

Product Code:
MeasurementLabs0007

## **Description:**

Astra Scientific Electrical Electronic and Pneumatic Calibration Bench

#### **Technical Specification:**

The calibration test bench consists, a console and a set of instruments, designed to give the learner full exposure in the maintenance and calibration of the pneumatic and electronic instrumentation which form the basis of process control.

#### **FEATURES:**

The equipment provides practical experience in calibrating

- Pressure gauges
- Pressure switches
- Thermostats
- Pneumatic differential pressure transmitters
- Electronic differential pressure transmitters
- Pneumatic pressure transmitters

Phone: +91-8860605265

Email: info@astrascientific.com

#### Electronic pressure transmitters

- Pneumatic indicators
- · Electronic indicators
- Electronic indicators/controllers
- Pneumatic level transmitters
- Electronic level transmitters
- Pneumatic recorders
- Electronic recorders
- Pneumatic indicators controllers
- Hydrostatic thrust level transmitters
- Capacitive probe level transmitters
- Pneumatic valves
- Positioners

### SPECIFICATION:

### Painted carbon steel structure

- 4 precision pressure gauges, -1 0, 0 1.6, 0 4 and 0-10, class 0.25%
- 1 manual control station, complete with precision pressure gauge
- 3 precision pressure reducers
- 12 pressure outputs
- 2 differential pressure glass manometers, height = 1000 mm,
- Stainless steel sleeve
- Digital multimeter, accuracy ±0.03%, current range 20 A,
- Voltage range 1200 V
- Signal generator: 4 20 mA
- Power supply: 12-24-48 V D.C.

Email: info@astrascientific.com

• Voltage control: 0 - 200 V

• Thermocouples simulator

RTDs simulator

• Power required for operation

230V, 50Hz, 1 phase

230V, 60Hz, 1 phase
