Mini Torso Model- 16 Parts

**Product Code :**  
ANATOMYSUK-AS06LAB003E

**Description :**

Mini Torso Model- 16 Parts

**Technical Specification :**

This incredible Mini-Torso from Educational Lab Equipments will be a perfect addition to your studies. The torso features 16 parts, including removable lungs, heart, liver, stomach, intestines, and head. The head can be bisected, and one half of the brain can be removed as well. In addition, 2 genital inserts are included, male and female, each crafted to exceptional detail. Each of the parts is meticulously crafted to display all major anatomical features. The heart can be bisected, allowing for a clear view of the internal structures of the heart, and easily snaps back together. The lungs, stomach, liver, and intestine can be removed as well, and the caecum can be easily removed from the intestine for additional internal view.
