

Product Name :
Money Bags Coin Value Game

Product Code :
MATHSUK-AS05LAB001B

Description :

Money Bags Coin Value Game

Technical Specification :

Money is earned by landing on a square labeled with a practical chore, such as setting the table (31 cents), or an entrepreneurial endeavor, such as a lemonade stand (15 cents).

If the spinner lands on "no nickels" then you collect your change with any coins except for nickels.

The object of this colorful and compact board game is to earn money while winding along a cartoon path.

In order to collect money, the spinner is used to determine which coins can or cannot be taken from the bank.

There is an additional incentive to use critical thinking and coin combining skills.

Extra money can be earned if you land on a "Bank Exchange" space and exchange your coins (for example, two nickels for a dime).
