

Product Name :
Plate Tectonic Model

Product Code :
GEOGRAPHYSUK-AS10LAB006

Description :

Plate Tectonic Model

Technical Specification :

Use this artistic re-creation to communicate the importance of plate movements in relation to volcanism and seismicity.

Provide your students with an innovative look at plate tectonics with this hand-painted resin model showing detailed representations of the Earth layers.

Oceanic floor spreading is also well characterized to illustrate the development of a rift into a new structure.

Both active and passive margins are shown in addition to oceanic ridges

with rift valley, Benjoff plane, oceanic trenches, continental shelf, and slopes.
