

Product Name :
Granulating Sieve Set

Product Code :
PHARMACEUTICAL SUK-
AS03LAB016A

Description :

Granulating Sieve Set

Technical Specification :

The sieves placed in sequential order of largest to smallest will allow a complete particle size breakdown. These sieves are excellent for determining the particle size of sand. It is ideal for checking topdressing sands, measuring the consistency of sand trap sands and a must for use during construction. The Sieve Set comes with a full USGA breakdown with six, eight inch diameter sieves that form a stack with the below diameter mesh screens.
