

Product Name :
Histological Slides

Product Code :
PHARMACEUTICAL SUK-
AS03LAB055A

Description :

Histological Slides

Technical Specification :

Graticule slides have measurement grids on their surface to aid in counting the cells or assessing the size of the objects. Glass slides are also made in various shapes for different purposes. For example, concave slides have a shallow upper surface to hold liquids.

A stain is applied to bring out its important features. A coverslip is placed to stabilise and protect the slide. A permanent mount is used for animal or human tissue studies. All water is removed from the cells of the specimen which is then sliced with the microtome and placed on the slide.
