

Product Name :
Animal Operation Table

Product Code :
PHARMACEUTICAL SUK-
AS03LAB118A

Description :

Animal Operation Table

Technical Specification :

The table is fitted with one light source with adjustable height and angle for focusing on the surgery. The standard tables are made of stainless steel and are equipped with digital temperature controller system for controlling the temperature of table surface. They can be moved to any place with the help of handle and wheel. This Operating table is good for general surgical work on small & large rodents.

The table is stainless steel in fabrication and the table top surface has a raised edge and drain hole to aid in control and drainage of fluids. The table is supplied with 4 rods and provision for fixing these vertical rods at fixed positions and 2 vertical rods with adjustable location by sliding on the raised edge for fixing the animal.
