

Product Name :
Hygrometer Digital

Product Code :
MEASUREMENT SUK-
AS03LAB022

Description :

Hygrometer Digital

Technical Specification :

A hygrometer is an instrument used for measuring the amount of humidity and water vapor in the atmosphere, in soil, or in confined spaces. Humidity measurement instruments usually rely on measurements of some other quantity such as temperature, pressure, mass or a mechanical or electrical change in a substance as moisture is absorbed. By calibration and calculation, these measured quantities can lead to a measurement of humidity. Modern electronic devices use temperature of condensation (the dew point), or changes in electrical capacitance or resistance to measure humidity differences.

FEATURES:

- Displays temperature, humidity and comfort level
- Continuous sample rate for accurate readings
- Max/Min temperature and humidity memory
- Easy installation
