

Product Name :
Tension Set Apparatus

Product Code :
RUBBER SUK-AS03LAB003

Description :

Tension Set Apparatus

Technical Specification :

- Material

SS

- Weight
5 Kilograms (kg)
- Usage
Rubber

With a vision to be a pioneer in our domain, we have been engaged in manufacturing and supplying Tension Set Apparatus.

It is used for testing tensile strength of various elastomers including rubber, belts, films, and engineered plastics as well. This apparatus is provided with enlarged ends to assure perfect gripping of specimen. Tension Set Apparatus is comprised of a load cell, piston, cylinder, crosshead, notched column, and tension crosshead.

Features:

- Assures correct results
- Easy to use
- Requires low maintenance
