Product Name:
Tubular Heat Exchanger

Product Code: LABUK-AP12LAB0007

## **Description:**

Tubular Heat Exchanger

## **Technical Specification:**

This equipment would be consist of the service unit that supplies the necessary utilities and measuring instruments to carry out tests on four types of heat exchangers:

Tube-in-tube exchanger,
Plate exchanger,
Shell-and-tube exchanger,
Jacketed tank
Specification of the Service Unit :-
Bench-top framework of AISI 304 stainless steel
Hot water generator of AISI 304 stainless steel with electronic temperature control, pump, heater of 2 kW and level switch
Pressure controller of cold water
2 electronic flow meters
6 thermo resistances Pt100

Phone: +91-8860605265

Email: info@astrascientific.com

Switchboard of painted carbon steel with ELCB
All data can be acquired by PC via the optional data acquisition software with interface system.
Power supply: 230 VAC 50 Hz
Single-phase 2.5 kVA
Specification of the tube in tube Heat Exchanger
6 sections of double pipes
Outer pipe of transparent Plexiglas.
Inner pipe of stainless steel.
Manufacture in India.
