

Product Name :
Astra Aflatoxin Analyzer

Product Code :
ASTRALAB-SUPPLYA2003

Description :

Astra Aflatoxin Analyzer

Technical Specification :

The aflatoxin detector uses microcomputer technology, which is easy to operate, clear and intuitive.

It has the display and printing functions of T, A, C measurement data, as well as the functions of dynamic part determination and linear concentration regression calculation, which brings great convenience to the analysis operator.

microcomputer aflatoxin detector is an important instrument for aflatoxin and ELISA analysis. Determine and quantify the concentration of mycotoxins in the sample through the working principle of ELISA and the corresponding kit. It is widely used in immunopathology and microbial detection. Antigens and antibodies, diagnosis of parasitic diseases, diagnosis of blood diseases, plant diseases and insect pests, and detection of toxins in food, food, fat, dairy products, medicines and beverages.
