

Product Name :
Astra Mini Closed Loop Extractor

Product Code :
ASTRALAB-SUPPLYA4012

Description :

Astra Mini Closed Loop Extractor

Technical Specification :

The mini closed loop air extractor is made of stainless steel. The closed-loop extraction system mainly extracts solvents from solid substances. And it is widely and mainly used in industry, for example, the extraction of hemp, that is, hemp is extracted from hemp leaves by washing with ethanol.

Ethanol recovery rate: 90%+

Low power consumption

Reduce labor

Quality, safety and precise operation

Flexible production capacity. Like CBD oil, it requires low temperature processing, even lower than the zero temperature below 80 degrees. We have mature processing technology to carry out oil with 99% purity.
