

Product Name :
Astra Mini Spray Dryer

Product Code :
ASTRALAB-SUPPLYA6007

Description :

Astra Mini Spray Dryer

Technical Specification :

The small spray dryer has a highly intelligent fully automatic control system, which is suitable for the research and development and production of trace particle powder in universities, research institutes and laboratories of food, biology, beverage, chemical, material, pharmaceutical and other enterprises.

Specially used for laboratory research, at least 20-30ml of liquid can complete a test

Full borosilicate glass, convenient and intuitive monitoring of process status.

The spray chamber, cyclone separator and receiving tank are all made of borosilicate glass, which can resist strong acid/alkali and high temperature. It can work in a pollution-free and stable environment.

Easy to clean, very easy to assemble and disassemble.

The air compressor is oil-free and will not pollute the compressed air. The sound is below 50db.

The inlet/outlet temperature is precisely controlled by PID

Use touch screen to display operation, control temperature, air flow, air pressure, pump speed and frequency of deblocking.

Feeding with rotary pump with adjustable capacity.

Automatic clogging device can prevent nozzle clogging and carry out variable control.
