

Product Name :
Medical Humidity Incubator

Product Code :
ASTRALAB-SUPPLYA10002

Description :

Medical Humidity Incubator

Technical Specification :

Internal volume: 250L~2000L;

Temperature range: 10?100?, temperature control fluctuation: $\pm 0.5?$, temperature deviation: $\pm 1.0?$;

Controller: Microcomputer controller, sensitive in sensing and small system error;

Compressor: Original imported fully enclosed compressor, high efficiency, low noise; to ensure long-term continuous operation of the equipment;

Data printing: It has a data acquisition system that meets GMP requirements, standard stylus printer and U disk storage;

Box material: The inner tank is made of mirror stainless steel 304, the four corners are semi-circular, which is easy to clean, and the shelf space in the box is adjustable;

System protection: Configure an independent over-temperature protection system;

Safety device: Compressor overheating and overpressure overload protection, fan overheating, temperature upper and lower limit deviation alarm;

Working environment: +5?35?

Remote alarm: Standard remote alarm port, optional remote mobile phone SMS alarm (with power failure alarm) (optional);
