

Product Name :
Medical Cooling Incubator

Product Code :
ASTRALAB-SUPPLYA10003

Description :

Medical Cooling Incubator

Technical Specification :

Cooling incubator,Adopting the latest structural design, using imported high quality and manufacturing technology to ensure long-term continuous operation of the equipment, stable and reliable performance, and suitable for stability testing and storage of temperature-sensitive drugs.

Internal volume: 150L~800L

Temperature control range: 5?, temperature control fluctuation: $\pm 1?$, temperature deviation: $\pm 2.0?$;

Temperature controller: Original imported digital display controller, high precision, low drift;

Refrigeration compressor: Original imported fully enclosed compressor, long life, low noise;

Defrosting device: automatic frosting device;

Data printing: A data collection system that complies with GMP requirements, standard stylus printer, and print data can be stored for a long time;

Data storage: U disk storage, which can store temperature history data for more than 1 year;

On-site alarm: On-site temperature deviation sound and light alarm;

Remote alarm: (optional) remote mobile phone SMS alarm (with power failure alarm), multiple devices can share a mobile phone card;

Box material: The inner tank is made of mirror stainless steel 304, and the outer shell is made of high-quality steel plate sprayed with plastic;

Safety devices: compressor overheating protection, compressor overpressure protection, compressor overload protection and fan overheating protection;

Installation power supply: AC 220V \pm 10% 50HZ;

Working environment: +5?35?;
