

**Product Name :**  
Medical Dry Bath Incubator

**Product Code :**  
ASTRALAB-SUPPLYA10006

**Description :**

Medical Dry Bath Incubator

**Technical Specification :**

The Dry bath incubator uses advanced laser and numerical control processing equipment to produce products; it is used in mining enterprises, laboratories, scientific research units, etc., for drying, baking, wax melting and sterilization.

Internal volume: 70L~1000L;

Temperature control range: RT + 10~200?, constant temperature fluctuation:  $\pm 1.0?$ , temperature accuracy:  $\pm 0.1?$ ;

Temperature controller: digital microcomputer P.I.D temperature controller, with timing function, accurate and reliable temperature control;

Alarm function: independent temperature limit alarm system, which automatically interrupts when the temperature exceeds the limit, and the experiment runs safely without accidents (optional);

Box material: The inner tank is made of mirror stainless steel, and the outer shell is made of high-quality steel plate sprayed plastic;

Timing range: 1-9999min;

Working environment: +5~40?;

Installation power supply: AC 220V $\pm 10?$ 50HZ;
