

Product Name :
Medical Small Deep Freezer

Product Code :
ASTRALAB-SUPPLYA11003

Description :

Medical Small Deep Freezer

Technical Specification :

The product has complete sound and visual alarms, including high and low temperature alarms, power failure alarms, sensor failure alarms and half-open alarms

This model of refrigerator is equipped with 2~3 high-quality steel wire shelves, which can be adjusted to any height to meet different needs

Standard built-in USB data logger, remote alarm contacts and RS485 interface for monitoring system

There is a cooling fan inside, which can work when the door is closed and stop when the door is open

CFC-free polyurethane foam insulation is environmentally friendly

The electrically heated glass door filled with inserted gas performs well in terms of heat insulation

The medical refrigerator is equipped with 2 sensors. When the main sensor fails, the auxiliary sensor will be activated immediately

The door is equipped with a lock to prevent unauthorized opening and operation
