

Product Name :
Medical Cooling Chiller

Product Code :
ASTRALAB-SUPPLYA11004

Description :

Medical Cooling Chiller

Technical Specification :

Large capacity Cooling Chiller, the lowest temperature is -120°C. It is a laboratory refrigerator that can handle various occasions.

This cryogenic coolant circulation pump is equipped with expected relays, protective devices and capacitors for refrigeration devices. With super-cooling ability and fast cooling speed, greatly improving work efficiency

Dedicated to refrigeration devices, expected relays, protection devices and capacitors;

Large cooling capacity and fast cooling speed greatly improve work efficiency.

The circulation system is made of anti-corrosion materials, and has the functions of anti-rust, anti-corrosion and low-temperature liquid pollution and sterilization.

The flow of the circulating pump can be adjusted or customized, which greatly meets the actual needs of different customers;

The microcomputer has a timer shutdown function. After enabling this function, the timer off time can be set arbitrarily from 0 to 100 hours.

The product is easy to use and can work continuously.
