

Product Name :
Astra Visible Spectrophotometer

Product Code :
ASTRALAB-SUPPLYA17012

Description :

Astra Visible Spectrophotometer

Technical Specification :

The sample room of the instrument can place cuvettes of various specifications between 5-50mm, which is convenient to use.

It is suitable for the basic laboratory of environmental protection major in universities and colleges as a teaching instrument.

The unique optical system, high-performance holographic grating and receiver are designed to ensure that the instrument has excellent performance indicators;

Single machine operation, linear regression equation measurement, etc.;

Apply the latest microcomputer processing technology to make the operation more convenient;

Manual wavelength adjustment;

Working method, T/A/C/F.

Standard configuration:

1 host

Power cord 1

1 cm 4-slot manual cuvette holder 1

1 cm standard glass cuvette 1 set (4 pcs)

Host instruction manual 1

Dust cover 1
