

Product Name :
Intelligent Micromouse Trainer

Product Code :
ASTRALAB-SUPPLYA21007

Description :

Intelligent Micromouse Trainer

Technical Specification :

Learning MCU programming for micromouse is an important course topic on Students can see the behavior of micromouse instantly after MCU code is programmed, downloaded and executed. Students to carry out 3 types of micromouse experiments on a lab table individually including wall maze solver, line maze solver, and line follower. With provided maze wall, post, and line track pad, students can setup corresponding experiment environments efficiently and flexibly.

The provided simulation software allows students to create the map of line maze and wall maze so as to observe how micromouse solves the maze.
