

Product Name :
Compressor Controls Trainer

Product Code :
ASTRALAB-SUPPLYA21016

Description :

Compressor Controls Trainer

Technical Specification :

The electrical connection of a commercially available refrigerant compressor using a circuit diagram is covered. The benchtop unit was designed for electrical training for refrigeration system installers and is particularly suitable for exercises in smaller groups. The electrical connection of a commercially available refrigerant compressor using a circuit diagram is covered. The starting, protection and control devices necessary for safe operation are arranged on the front panel of the unit. Test points provide convenient access for measuring the electrical circuit.
