

Product Name :
Ice Plant Test Rig

Product Code :
ASTRALAB-SUPPLYA21025

Description :

Ice Plant Test Rig

Technical Specification :

These are environment friendly. The system is fabricated such that students can observe and study ice formation process. The Ice Plant Test rig works on simple vapour compression refrigeration cycle and uses a refrigerant. The arrangement of parts such that, all the parts are visible and working can be easily understood. It is also useful to understand working of vapour compression system, its performance and controls used.

List Of Experiments:-

To Plot System Performance On P-H Chart.

To Evaluate Capacity Of The Ice Plant.

To Calculate C.O.P. Of The System.
