| <b>Description :</b>  |
| Digitized Semiconductor Curve Tracer  |
| <b>Technical Specification :</b>  |
| All results are displayed on built-in TFT LCD screen without additional oscilloscope or PC. All captured curve data can be displayed on LCD screen and saved in PC. Two sets of the testing socket are available for users to switch between two devices for rapidly test and comparison. Two sets of the testing socket are available for users to switch between two devices for rapidly test and comparison. It also provides the touchscreen for intuitive manipulation-simply touchscreen buttons to set up desired measuring conditions, including device type, |

voltage bias, or current steps, etc.

Save and reload maximum 8 sets of previous curves for revision and comparison.

Reserve USB port to load data into PC.

Built-in TFT LCD screen, no PC required.

Provide two sets of test socket for quick measurement and curve comparison.

Generate 8 sets of digital curves on LCD screen in 1 second.

Alternatively connect to external scope for real-time measurement.
