Product Name : Recycled Gas Engine Performance Program	**Product Code :** ASTRALAB-SUPPLYA21047

Description :

Recycled Gas Engine Performance Program

Technical Specification :

Engines have sophisticated microprocessor based algorithms that control engine performance. With the Variable Fault Feature, the instructor can use the switches to demonstrate the loss of circuits while the engine is running. Because of these technological changes, the automotive technician must understand each subsystem's unique role in operation as well as it interdependence with other components.
