

Product Name :
Fatigue Testing Machine

Product Code :
ASTRALAB-SUPPLYA21083

Description :

Fatigue Testing Machine

Technical Specification :

Threaded Spindle With Hand Wheel, Spring Balance.Speed Measurement Via Contactless Inductive Speed Sensor. Electronic load cycle, can also be used to indicate the speed. Automatic Shut Down On Test Bar Fracture By Stop Switch Integrated Into the Movable Support. 3 Sets Of Cylindrical Test Bars made of Steel, Special Shape Bars For Demonstrating The Influence Of Notching And Surface Finish. Drive Via Electric Motor.

Test bars

Material: Steel Ck35.

3 different shapes.

Electronic load cycle counter

8-digit digital display

Can be switched to display speed

Motor

Speed: 2.800min-1

Output: 0,37kw

Load: 0...300N
