

Product Name :
Brake Drum Friction Apparatus

Product Code :
ASTRALAB-SUPPLYA102001

Description :

Brake Drum Friction Apparatus

Technical Specification :

To be bench-mounted Brake Drum Apparatus with single leading and trailing shoe

To have drum torque and braking load applied by weight hangers and cords

Used in the determination of coefficient of friction

To be a simulation of a real brake system

To have simple transition from leading to trailing brake shoes

An Instruction manual for student and lecturer provided
