

**Product Name :**  
Control/Unit for Twin Rotor MIMO System

**Product Code :**  
ASTRALAB-SUPPLYA138003

**Description :**

Control/Unit for Twin Rotor MIMO System

**Technical Specification :**

The twin-rotor system demonstrates the principles of a non-linear MIMO (multiple input, multiple output) system, with significant cross-coupling.

Its behavior resembles a helicopter, but the angle of attack of the

rotors is fixed and the aerodynamic forces are controlled by varying the speeds of the motors. Significant cross-coupling is observed between the actions of the rotors, with each rotor influencing both angle positions.

Features:

Visually & technical interesting control problem.

Non-Linear model.

Excellent for demonstration laboratory work.

Excellent model for more advanced research work including designing your own control systems.
