

Product Name :
Electric Circuit Lab

Product Code :
CIR-LABAST-001

Description :

Electric Circuit Lab, We are manufacturer, supplier, exporter and solution provider in quality Electric Circuit Lab

Technical Specification :

Electric Circuit Lab The KL-100 Linear Circuits Lab(1) Electric Circuits Lab is a comprehensive and self-contained system suitable for tuition and experimentation with electric circuits.

All necessary equipments for electric circuit experiments such as power supply, function generator, analog and digital meters are installed on the main unit.

The 11 modules cover a wide variety of essential topics for electric circuit. It is indeed a time and cost saver for both students and engineers interested in training, developing and testing prototypes circuit.

- Experiments for Basic Electricity
- Experiments for Magnetism
- Experiments for Basic Electronic Circuits
- Experiments for Simple Electronic Circuits
- Experiments for Industrial Control Applications
- Experiments for Oscillator Characteristics and Applications- Ideal for electric circuit experiments and design exercises
- Integrated trainer with complete curriculum
- Complete with power supplies and test systems for easy and efficient experimentation
- Universal breadboard (1680 tie points) for circuit design and

prototyping
- All modules equipped with an 8-bit DIP switch for circuits fault simulations
