

Product Name :
Industrial Electronic Trainer

Product Code :
CON-LABAST-001

Description :

Industrial Electronic Trainer, We are manufacturer, supplier, exporter and solution provider in quality Industrial Electronic Trainer

Technical Specification :

Industrial Electronic Trainer To train technicians to be able to install and maintain electronic equipment becomes important nowadays. A good technician should follow state-of-the-art technology and rapid products innovation.

Our system is intended for the technical education. In fact, KL-500 is adapted to theoretical and practical courses for studying power electronics and industrial electronics.- Power Supply Unit Experiment

- UJT Experiments
- PUT Experiments
- PUT & SCR Experiments
- SCS Experiment
- UJT & PUT Trigger SCR Experiments
- SCR Control DC Motor & DIAC, TRIAC
- Automatic Control Lamp, TRIAC Control Speed Experiments
- Temperature Radio, Photo-Couple and Touch Control Experiments
- Over/Under Voltage Breaker and Flasher Control Experiments
- TRIAC Liquid Level & IC Timer Switch Experiments
- Digital Signal Driver & Zero-Voltage Switch Experiments
- Zero-Voltage Switch Experiments

- SCR Converter Experiments
- SCR Rectifier Circuit Experiments
- JFET/MOSFET Characteristic & MOSFET Speed Control Experiments
- IGBT Characteristic & IGBT Speed Control Experiments Comprehensive study including the theoretical study and practical exercises
- Use of industrial-type components, devices and circuits
